📁 PROJECTS

Dhallaty platform

Built a production-ready full-stack platform connecting lost and found items, with PayTabs payment integration and secure webhook verification. Implemented JWT authentication with refresh token rotation, PostgreSQL schema design, and an admin dashboard for managing and matching reports. Designed a bilingual (Arabic/English) RTL interface and deployed on a VPS using Nginx and PM2.

TechNotes — MERN Stack Notes & Ticket Management System

Developed a full-stack ticket management system using MERN with TypeScript. Implemented JWT authentication with HTTP-only refresh tokens and role-based access control. Built a scalable React frontend using Redux Toolkit and RTK Query for state management, caching, and optimistic updates.

E-Store Platform

Built a full-stack e-commerce platform with Stripe Checkout integration and automated PDF invoice generation. Implemented authentication, role-based authorization, image uploads, and password reset via email. Developed scalable backend features including pagination and dynamic server-rendered views.
